Dimond corrugate wall cladding (specify thickness and coating)

Flashguard or notched flashing fixed to Climaseal coated self drilling 12g x 35mm tek screw at every 2nd crest

Dimond corrugate roofing (specify thickness and coating)

Roofing underlay and netting shown dashed

Foam closure strip on top of roofing (see note below)

Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
