Structure

Dimond hi-span steel purlin
(specify size)

Dimond hi-span steel purlin

Roofing underlay and netting
shown dashed

Foam closure strip under roofing
(see note below)

Apron flashing fixed to roof with
12g x 25mm T17 or 4.8ø
aluminium rivets at 1000mm
centers between purlins

Climaseal coated self drilling 12g x
35mm tek screw rib fixed

Dimond corrugate wall cladding
(specify thickness and coating)

Dimond corrugate roofing (specify
thickness and coating)

Roofing underlay and netting
shown dashed

Notes:
- Foam closure strip only required if bird or vermin proofing is
  required, or if in a high wind area, there is a risk of windblown
  moisture entering the building.
- These details are suitably fixed to allow for a theoretical
  thermal movement of up to 10mm. For thermal movement
  greater than this a clipping system should be considered.
