20mm thick cavity battens

Dimond corrugate wall cladding
(specify thickness and coating)

Climaseal coated M6 x 50 Roofzip screw pan fixed

Flashguard or notched flashing fixed to Climaseal coated self drilling 12g x 35mm tek screw at every 2nd crest

Roofing underlay and netting shown dashed

Continuous cavity drainage closure strip

Dimond corrugate roofing stop ended

Dimond hi-span steel purlin (specify size)

Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- Leave foam out if ventilation is required.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
