

Dimondek 300 clip fixed with 10g x 16mm wafer head tek screw

Additional flashing for high wind exposure notched over lower roof profile

4.8ø aluminium rivets at every rib on sheet ends

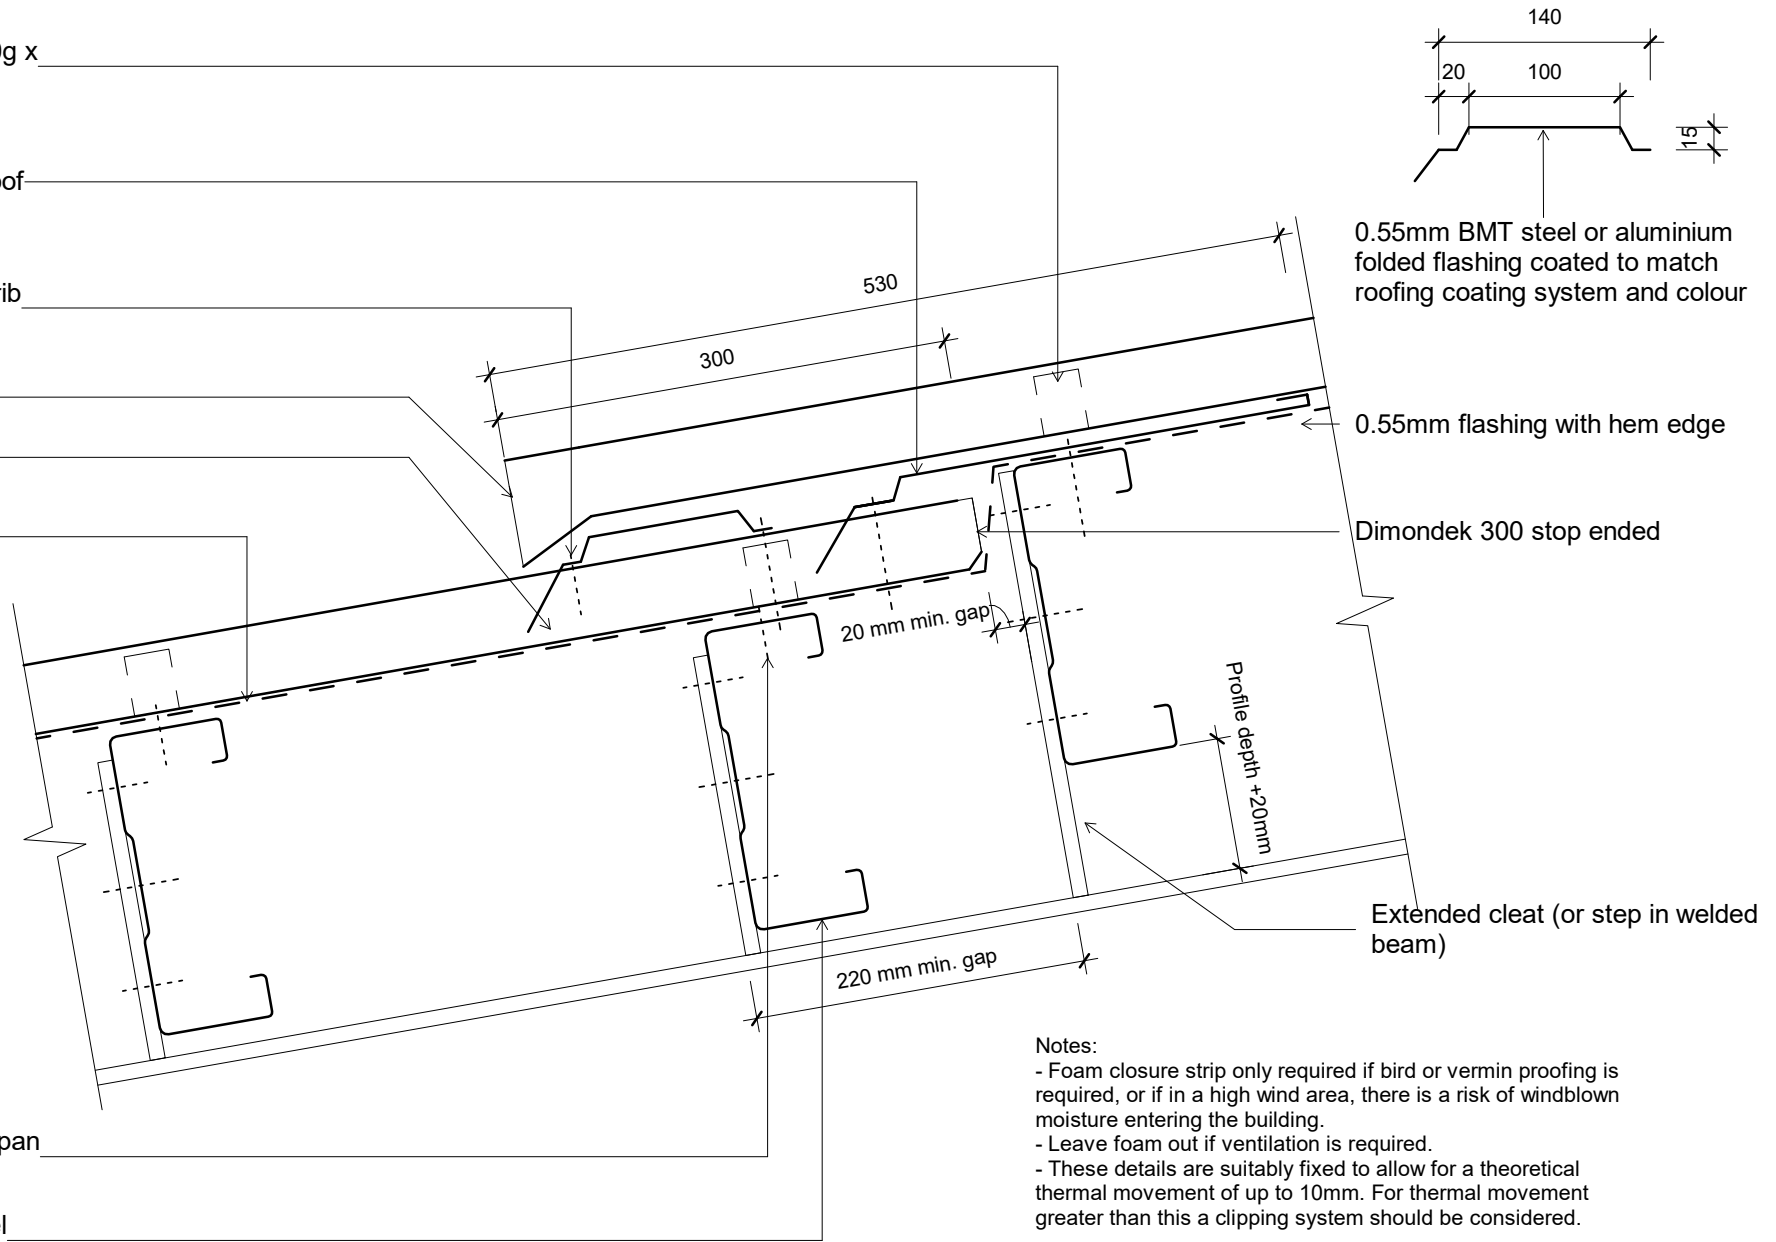

Dimondek® 300 roof (specify thickness and coating)

Potential dirt build-up

Roofing underlay and netting shown dashed

M6 x 20mm self drilling roofzip pan fixed

Dimond hi-span cold rolled steel purlin (specify size)

- Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
 - Leave foam out if ventilation is required.
 - These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.

Original Size A4
