Dimondek 630

Continuous clip fixed with M6 x 25 Roofzip

Extended cleat (or step in welded beam)

0.55mm BMT steel or aluminium folded flashing coated to match roofing coating system and colour

0.55mm flashing with hem edge

Continuous clip fixed with M6 x 25 Roofzip

Dimond hi-span cold rolled steel purlin (specify size)

Potential dirt build-up

Foam closure strip under roofing

(see note below)

Climaseal coated self drilling 12g x 35mm tek screw with washers and seals @ every rib on sheet ends

Dimondek® 630 roofing (specify thickness and coating)

Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- Leave foam out if ventilation is required.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
