

Building wrap shown dashed

20mm thick cavity battens

Continuous clip fixed with Roofzip M6 x 25 Roofzip

Climaseal coated self drilling M6 x 50 screw fixed every second pan

Foam closure strip on top of roofing (see note below)

Notched flashing folded and fixed to Dimond thermal expansion flashing clips with 4.8 ϕ aluminium rivets at every 2nd rib

Roofing underlay and netting shown dashed

Continuous clip fixed with M6 x 25 Roofzip

Continuous cavity drainage closure strip

Dimondek 630 roofing stop ended

Dimond hi-span steel purlin (specify size)

Notes:

- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- Leave foam out if ventilation is required.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.

Original Size A4

Dimondek 630
