Air seal

Maintain a 5mm gap around the window frame

Line of sill flashing below

Use sealant for very high wind zones & above

20mm thick cavity battens

0.55mm BMT end flashing with hem edge behind cladding to extend to ground or exit point

0.55mm BMT purpose made jamb flashing (specify coating)

Maintain a 5mm gap around the window frame

Notes:
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
