**Dimondclad Rib50 cladding**  
(specify thickness and coating)

**Climaseal coated self drilling M6 x 50**  
Roofzip fixed every pan

**Roofing underlay and netting**  
shown dashed

**Dimond hi-span steel purlin**  
(specify size)

Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
- Where CCA or ACQ treated cavity battens are installed a barrier between the batten and the cladding is required.
