Supporting steel structure

Climaseal coated self drilling 12g x 35mm tek screw pan fixed

Foam closure strip on top of roofing (see note below)

Notched flashing fixed to ribs with M6 x 65mm Roofzip every second rib

Roofing underlay and netting shown dashed

Foam closure strip on top of roofing (see note below)

Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
