Foam closure strip under roofing
(see note below)

Climaseal coated self drilling M6 x 65 Roofzip with washers and seals @ every rib on sheet ends

Roofing underlay and netting shown dashed

Timber packer to suit roof slope. Width to suit purlin size

Dimond hi-span steel purlin (specify size)

Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
