Timber packer to suit roof slope.
Width to suit purlin size

Climaseal coated self drilling M6 x 65 Roofzip with washers and seals @ every rib on sheet ends

Foam closure strip under roofing (see note below)

Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
