Climaseal coated self drilling M6 x 65 Roofzip pan fixed

Dimond LT7 roofing stop ended

20 mm min. gap

20 mm min. lap

200 mm min. lap

Dimond hi-span steel purlin (specify size)

Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- Leave foam out if ventilation is required.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
