

- Notes:
- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
  - These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
  - Where CCA or ACQ treated cavity battens are installed a barrier between the batten and the cladding is required.

Original Size A4

**Solar Rib**  
**Roof**  
 Wall - Roof Junction
