

175mm OR 300mm WIDE

Climaseal coated self drilling M6 x 50 Roofzip pan fixed

Dimond Solar-Rib® wall cladding (specify thickness and coating)

Notes:

- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.
- Where CCA or ACQ treated cavity battens are installed a barrier between the batten and the cladding is required.
