

## Tested in the wet, seven metres of it to be precise

No good roof is complete without an equally as good rainwater system. Dimond® Roofing have an extensive range of fascia, gutter, down pipe and rainwater heads to suit any style of home. We've used them at Dumpling Hut on the Milford Track, where seven metres of rain a year beats the heck out of any wind tunnel.

It doesn't matter if you're building an architectural dream home, a bach by the sea or renovating an existing house, our wide range of products will ensure your project looks the part. We've got an extensive range and are also very familiar with making custom products/one off designs for projects that require something out of the ordinary.

# Fascia

Residential, Light Commercial

## F180 Fascia - a long-run versatile fascia.

Manufactured from steel based substrate materials with a face height of 180mm and 35mm across the sole, F180 is suitable for most roofing.

## Paltec Fascia - a discreet appearance.

Paltec Fascia is a steel based product with a face height of 165mm and a sole of 52mm. It provides a discreet appearance that enhances our spouting profiles.

# Spouting

Residential, Commercial

## Quad Spouting - a traditional look.

Exhibiting a traditional “D” shape design, Quad Spouting is also known as ¼ round. Available in two sizes, 125mm and 150mm, it comes with several unique bracket options. Suitable for Corrugate, Hi Five, Six Rib and Eurotray.®

## Klassic Spouting - for on-site ease.

The “Klassic Profile” has a timeless style that is equally at home on new builds or renovations. It can be installed onto Paltec, F180 or timber fascia systems with concealed spouting brackets. Suitable for Corrugate, Hi Five, Six Rib and Eurotray.®

## 1/2 Round Spouting - suits a range of profiles.

Stylish and elegant, Dimond’s ½ Round Spouting comes in three sizes and is available in a wide range of materials. This popular spouting is featured in a number of award-winning architectural designs. Suitable for Corrugate, Hi Five, Six Rib, Eurotray® and Solar-Rib.®

## Hi Line Spouting - an industrial style.

Exhibiting an industrial look and feel, Hi Line Spouting has a unique high front that allows for wind and visual protection at the end of the roof cladding installations. Hi Line is ideally suited to larger-ribbed roofing profiles and comes in commercial and residential size options. Suitable for Solar-Rib®, Mega 5, Six Rib to LT5 and LT7.
