

Notes:

- Foam closure strip only required if bird or vermin proofing is required, or if in a high wind area, there is a risk of windblown moisture entering the building.
- Leave foam out if ventilation is required.
- These details are suitably fixed to allow for a theoretical thermal movement of up to 10mm. For thermal movement greater than this a clipping system should be considered.

Original Size A4

# Baby Corrugate Wall

Horizontal Cavity Cladding - Wall/Roof Junction

Issue: 01	Reference <b>dim_bbc_2180</b>
Scale: 1 : 5	
Date: 28 November 2018
